

## Failure predicts success: Why “kicking yourself” might be a good thing.

Aerworthy Consulting, LLC conducted research to investigate whether pilot-induced mishaps could be understood more fully through the lens of professional ethics and moral psychology. The simulator study tested 108 pilots of widely varying training and flying backgrounds. Using a pre-test/intervention/post-test design, our initial results show that (1) our diagnostic tools proved effective in correlating to performance outcomes and (2) pilots who crashed on the first flight (pre-test) showed statistically significant improvement on their post-test flights

**Directions:** The Ramada Inn is immediately to the northeast of the Centennial airport Control Tower. Arapahoe conference room.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
